**Subject:** RE: Quarry Letter

Just a suggestion...

Second last paragraph should probably mention option of protection.... 'protection and mitigation options proposed'...since it may be determined by MNR that not necessarily all impacts and/or reduced impacts are acceptable.

**Subject:**

Thanks for meeting this morning. If there are any comments please pass them on to me by end of day Tuesday (in email). I'll speak with Karen Stokes about securement possibilities given that MNR's preference would be for long term protection to be afforded to as much confirmed unique alvar habitat as possible.
