

Dave Webster - MNR Hydrogeologist

↳ verifying Hydrological, Hydrogeological, Nat. Env. 1 & 2

→ or criteria est. by Mun as "significant" per PPS

Atvar - best captured in SWH → see Technical Guide & Eco Region 6E criteria

- even if incl. SAR b/c most don't have specific mapping guidelines yet

- possibility for ANSI status?

OP → need to designate SWH, have any studies peer reviewed

ZBA → EMR to EM study for this?

AKA → we review NEnv. level 1 & 2

So are responsible for designating or delineating the SWH on site

* should be pending AKA

→ so don't alter site (even w/out AKA) w/ for site prep

↳ don't need the Muns to have duplicate studies done

→ the current EMR is the only protection for now

(20 day review)

* received application before Christmas - incomplete - returned

will have another 20 days when receive again

if complete - consultation & notification - 45 day review for impacts.

* has been submitted again (08)
