Subject: RE: Acquired property Management Funding

We gave Tom a list of areas worth seeking/buying properties due to conservation reasons a while ago. Could this list be visited?

Braeside Alvar is another area at risk where we should be buying up properties...PPS/OP process of protection as private land in not working very well.

I have only one site that comes to mind and tried to get Ontario Parks to incorporate into the parks plan about 10 years ago. It is an OPG island in the river

Folks
Please provide any suggestions to me regarding this funding.
Thanks...

Al and Terry
Would we want to apply for this funding again this year? If yes please fill in the attached form and return to Fay.
Thanks
Mona

Subject: Acquired property Management Funding

Hello:

Once again the Land Securement program of Land Management Section has a limited amount of funding available for acquired property management projects for this fiscal year.

Districts may submit their requests for individual project funding by completing the attached template for each project and forwarding it to me by May 23rd . Projects will be given priorities based on legal liabilities, partnership support, conservation purposes and controlling or providing public use/access. As funding is limited it would not be reasonable to submit costly projects such as bridge/road construction or other similar infrastructure projects. There will be an attempt to distribute the funding to as many districts as possible.

The funding source is from the Ministry's land securement allocation which is focused on the securement of lands for conservation purposes as well as the management of lands that have been acquired for conservation purposes. We are therefore restricted to using it for projects on acquired lands only.

Give me a call if you have any questions.
