Subject: Breaside Quarry - Official Planning and Aggregate Licencing

FYI

I received another phone call this morning call Ms. Norma Moore of Braeside area. I spoke with her from 1106 to 1125hr.

She was following up on an earlier phone call to me to confirm her information on alvar habitats. She again expressed her concern over the proposed quarry expansion, and water taking permit apparently issued by MOE last year. I directed her to MOE with respect to the water taking permit questions/concerns, and that MNR may have comments/concerns with respect to fish habitat but it would probably be DFO's lead if there were issues.

Her questions to me were about the alvar and my role in the ongoing municipal planning work and the aggregate licence application process in general.

I referred Ms. Moore to talk to Keltie about the aggregate licencing and to Joanna about MNR's role in ongoing municipal OP development.
