

Boardroom  
MNR

Sept. 11. 07

Miller Quarry

Attended: Joanna G  
Paul M  
Mike D.

Tom Miller  
Dan Brenton  
Gary Bell  
Councilor from Tu  
County Planner  
ecology  
Bruce

- all applications concurrent

comments on pre-application on ARA

- missing re ecology  
- balance of PPS

Process:

3-4 weeks to review (ZBA area + NHF) level I report.

20 day completeness window ARA ✓

40 day review period under ARA ✓ then ARA public meeting then ZBA/OPA public meeting

- Dayl has been just to N. of this property / not sure if wants to go back to the site?  
- OH under ARA (just prior to OH for planning act)

- then Public Meeting under Planning Act / OPA / ZBA

(NHF zoning) in ARA boundary → enforceability under ARA, consult in Aylmer (powers to enforce)

(dual zoning: Aggr Reserve + NH presentation area (zoning) (interesting approach)

in SWH (protection area)

→ plants highly independent from asphalt plant (W@ E of hill, resident, some reference to it in the OPA submission) + its impacts

→ Level II - in preparation by Botanist (not Dan) will discuss impact from plant on plants; + will discuss what to do  
progressed for extra

Why license all of area including SWH / features?

Mike D ▷ trespassing (property protection) + enforceability under Act stronger plus quoted as reason to ind. SWH reserve in licensed area John

↳ Twp comments will be sought by Gary Bell on this

(▷ also notes on site plan can flush out precisely what can or cannot happen for conservation ▷ MNR will get opinion from Region + Aylmer on this

possible reason for Miller

▷ amendment to license vs. new license application for additional expansion. (if more expansion sought in future)

2005 + 2007 ▷ 2 bad blast events have caused more public apprehension

↳ now have blaster that has been operating on site > 30y

▷ Moose's report on 2007 event may influence notes on site plan

▷ Twp will have full peer review (NHF not certain) & to be passed on to Miller. EIS

▷ County soon providing landuse re. alvar area in Twp. (MNR map).

\* overlays to re-map based on constraint analysis (existing development)

▷ County may be doing additional constraint analysis of aggregates Jim Hutton to determine

Level I - Dan Burton

Level II - Botanist - & Kyle (monitoring for system?)

What to do w plants to be destroyed? impact to wetland.
