Subject: RE: Sand Point Alvar

Hello Dan,

Thanks for the report. We don't make statements about the ecological sensitivity of a site for ecogift purposes until we get a request to certify the land and our Regional Director has signed the Certificate for Donation of Ecologically Sensitive Land. However, based on the report and our previous conversation, I would feel comfortable if requested to recommend the land as presented in the report for ecogift certification.

As the Ottawa Riverkeepers are not a listed ecogift recipient you may want to consider applying - see our handbook for details, or pursue working with an already listed recipient.

Sincerely,

Graham

Hi Howard:

I am attaching a pdf version of a report on the natural environment characteristics and significance of the Bula Property (Sand Point Alvar) near Arnprior. I am contemplating sending it to Mr. Bula tomorrow if for no other reason but to underscore with him that we're serious about seeing this place protected and are prepared to put a bit of effort into it. I've not heard back from him regarding that deadline for a decision, however, nor have you, I gather.

Cheers,
Dan
